BA, Graphic Design, Eastern Washington University, Winter 2007
Minor in Multimedia Programming and Web Development

PROFESSIONAL EXPERIENCE

14Four, March 2007-December 2013, July 2014 - Present

Flash Developer

- Build interactive applications, and banner ads using Flash and Actionscript
- Debug, optimize, and QA projects, as well as suggest optional enhancements to the user experience.

Interactive Developer

- Transitioned from Flash developer, to develop for a multitude of platforms/technologies such as iOS, Javascript, HTML 5, and mobile/responsive websites.
- Helped find new tooling to create a better internal workflow for developers, as well as new software to manage projects effectively
- Worked directly with backend developers to integrate websites into backend APIs and 3rd party APIs.

Team Lead

- Helped implement/integrate agile development process
- Responsible for a team of 4-5 developers, running daily/weekly meetings, and training junior developers.
- Scoped new projects, estimated out cost and timing, and helped lead creative brainstorming sessions.

North By Northwest, January 2014-July 2014

Interactive Developer

- Planned and developed modern responsive websites from inception to completion, as well as web apps, and mobile apps.
- Responsible for wireframes, sitemap, user experience, information architecture, development, and testing.
- Presented to clients on a weekly basis, oversaw design/developer interns, and often lead a team during the course of a project.

Freelance/Consulting, January 2012-Present

- Developed websites, and mobile apps, as well as CMS integration in Wordpress and Craft CMS.
- Responsible for business development, client communication, and deploying applications and websites.
