PROFESSIONAL EXPERIENCE

Treatment, *March 2015-Present*
Partner/Developer
- Responsible for entire technology department, server setup, workflows and technologies.
- Worked as operation manager for the company and worked directly with project managers to create scopes and timelines.
- Worked as a full stack developer creating both the frontend and backend of websites using CraftCMS, Wordpress, and Shopify.

North By Northwest, *January 2014-July 2014*
Interactive Developer
- Planned and developed modern responsive websites from inception to completion, as well as web apps, and mobile apps.
- Responsible for wireframes, sitemap, user experience, information architecture, development, and testing.
- Presented to clients on a weekly basis, oversaw design/developer interns, and often lead a team during the course of a project.

14Four, *March 2007-December 2013*
Interactive Developer
- Develop interactive websites, applications, and banner ads using Flash and Actionscript.
- Transitioned to developing for a multitude of platforms/technologies such as iOS, Javascript, HTML 5, and mobile/responsive websites.
- Debug, optimize, and QA projects, as well as suggest optional enhancements to the user experience.
- Helped find new tooling to create a better internal workflow for developers, as well as new software to manage projects effectively
- Worked directly with backend developers to integrate websites into backend APIs and 3rd party APIs/platforms.

Team Lead
- Helped implement/integrate agile development process
- Responsible for a team of 4-5 developers, running daily/weekly meetings, and training junior developers.
- Scoped new projects, estimated out cost and timing, and helped lead creative brainstorming sessions.

Freelance/Consulting, *January 2012-Present*
- Developed websites, and mobile apps, using platforms like Wordpres and CraftCMS.
- Responsible for business development, client communication, and deploying applications and websites.
